Hardware assets

Barcode labels
NBS Workflow

**Budget & Purchases module**

1. Purchase request
2. Accountings
3. Manager
4. Purchase order
5. Delivery

**Assets & Inventory module**

1. Delivery
2. Barcodes
3. Installation
4. Inventory
5. Assets tracking

**Smartphone application**

**Scan a barcode or search for a serial.**

Get immediately all relevant information regarding your item: Site / Room / Owner / Status and Dates: warranty / testing / purchase / start of service / expected return and more... Perform easy inventory simply using your phone, right away.

**See also items documents:**

- Invoices / manuals / etc.
- Snap a picture and send it immediately in the database.
- Flag the item for repair.
**OPTIONS**

**NeoScreener touch**

Control 6 lines of your Telos or AEQ system without any dedicated telephone (such as Desktop Director, Vset or other).

Can be used standalone or with NeoScreener.

Frees-up space and improves integration in the studio.

**NeoScreener SMART**

iOS Android Application for Tablets.

Replaces the « Talent » screen of NeoScreener, allows to set calls on air and to communicate with the studio.

Developed for remotes, NeoScreenerSmart works anywhere using 3G/4G.

**Push / Pull Services**

- Automate registrations to contests
- Automate call cards
- Ingest RSS feeds in NeoWinners
- Redirect messages according to keywords

**NeoWinners ROBOT**

Send email notifications to the appropriate users according to actions and events occurring in the database.

One « guest list » which expired without being printed, current day winners, modification of a category, report of unfulfilled contests.

All these elements can be automatically sent by NeoWinnersRobot.

**Multi-Stations**

Share all of your audience and winners data in a single centralized database!

The NeoWinners and NeoScreener « cluster » versions allow you to manage several stations within the same single database.

This kind of installation is suitable for a Media Group in the same city / market.

**NeoWinners SMART**

An iOS Android application that runs on Tablets and Smartphones.

NeoWinners on-air module has been ported to Mobile devices so that your teams can operate contests while on a remote, accessing the station’s database.
SERVICES

DATABASES HOSTING IN CLOUD

NeoGroupe offers you to take care of your databases hosting in Cloud mode.

Simplify the maintenance of your installations!

NeoGroupe offers to host your database on 2 redundant servers. Guaranteed availability: 99% of uptime, guaranteed bandwidth 500 Mbits/s, up to 1Gb. Complete daily backups over 30 days in the past in 2 different physical locations. Failover IP Service. Hot online reindexing overnight. Database Service availability supervision.

TRAININGS

NeoGroupe offers your Radio and Television teams the knowledge which they need to reach their goals, and help you improve efficiency within your organization.

Training sessions on our products are performed at Clients sites and are based on specific user guides. We adapt our training scheme to your needs. Trainings span over 2 to 5 days according to the number of people to train.

NeoGroupe supplies trainings in order to master freshly installed software, as well as to how to operate new functions after version updates.

DATA CONVERSIONS

We can convert and uniform your existing data sets to import in our applications databases.

HARDWARE

- **Dymo Label printer pack**
  - Used in NeoWinners to print individual shipping, addresses label or in NBS to print barcodes for inventory items.

- **Bluetooth Barcodes Reader**
  - USB Interface. Used with NeoWinners / NBS
About NeoGroupe

Founded in 2002, NeoGroupe manufactures software applications for small to large-scale businesses, including radio and television broadcasters. NeoGroupe’s applications feature intuitive functionality and enhance the workflow between individuals in a business environment. The company develops standard and tailor-made solutions based around its extensive media workflow experience and boasts a variety of customers ranging from high-profile talk shows to major public organizations worldwide. Applications include contest management, call screening, SMS/website audience interaction, budgets, purchasing and hardware inventory solutions.
